### **DETAILED ACTION**

1. **Claims 1-34** have been examined.

#### ***Information Disclosure Statement PTO-1449***

2. The Information Disclosure Statement submitted by applicant on 02/21/2002 has been considered. Please see attached PTO-1449.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. I.e. "unconditional" and "reversible property". Examiner cannot find any definition for the above phrases in the specification.

Art Unit: 2132

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

6. Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-34, the phrase "which is unconditional and does not have a reversible property based on a reverse arithmetic operation" phrases makes the claims indefinite and unclear in that neither means/method steps nor interrelationship of means/method steps are set forth in these claims in order to achieve the desired results expressed in the "which is unconditional and does not have a reversible property based on a reverse arithmetic operation" phrases.

In claims 1-34, the "which is unconditional and does not have a reversible property based on a reverse arithmetic operation" phrases makes the claims indefinite and unclear" phrases makes the claims indefinite and unclear. It is not clear what unconditional means?
